Education

SUNWAY UNIVERSITY & LANCASTER UNIVERSITY

MALAYSIA, UK

Candidate for Bs(Hons) Computer Science

Jan 2022 - Jan 2025

- Created Robotic Dog, Autonomous Mobile Robot and Combat Robot for Sunway Robotics Competitions
- Relevant Coursework: Artificial Intelligence, Computer Vision, Computational Intelligence, Distributed Systems
- Final Year Capstone Project: "Design and Development of a Quadruped Robot for Autonomous Navigation in Dynamic Environments"

SUNWAY COLLEGE

KUALA LUMPUR, MY

Candidate for Sunway Foundation in Arts Programme

Jan 2021 - Jan 2022

- Sunway Futsal Club, Sunway Athletics, Sunway Tech Club.
- Relevant Coursework: Business, Computer Science, Microeconomics

Experience

LOGIFLOW AUTOMATION

SHAH ALAM, MY

Mechatronics Engineer (Software Specialized)

Jan 2025 - Mar 2025

- Conducted stress tests on the ASRS, evaluating inbound-to-outbound workflows, including pallet verification, AMR transport, stacker crane operations, and order retrieval.
- Operated stacker cranes in various modes and documented guidelines for technicians.
- Analyzed Transport Port correlations, identifying floor leveling issues and optimizing crane parameters.
- Ensured seamless sensor synchronization before customer handover, verifying AGV sensors, barcode scanning, forklift sensors, and stacker crane components.
- Measured expansion area for AMR deployment and conducted detailed measurements of racks and goods.
- Verified rack specifications to ensure compatibility with Geek+ solutions for goods management and storage.
- Familiar with Geek+ API for put-away and picking orders using HTTP POST requests with JSON data

SUNWAY ROBOTICS CLUB

KUALA LUMPUR, MY

Head of Event Management

Aug 2024 - Jan 2025

- Oversee events, create, suggest and organize events ensuring they run smoothly, and resolving conflicts and issues promptly
- Organized events and workshops such as Arduino 1.0, 2.0 , 3D printing workshop, and talks

- Developed a sustainable education documentation which outlines the guidelines that future event managers can follow when organizing workshops
- Lead for Project Developers and Event Management Teams, to develop workshops and organize talks and events.

ALVA PRODUCTIONS

KUALA LUMPUR, MY

Mobile Applications Developer

Jan 2024 - Apr 2024

- Built a mobile application for film production directors to manage their team of directors, actors and display all their contacts and personal information in a single application.
- Worked alongside teammates that worked remotely while ensuring a smooth communication between all members and manager.
- Team leader, correcting, compiling code to ensure smooth integration and development of code structure and organization.
- Programmed in Dart, Flutter and integrated Firebase for data retrieval

Projects

McDonald's Outlets Locator with NLP

Mar 2025 - April 2025

~ React, FastAPI, PostgreSQL, AWS RDS, EC2, Selenium, BeautifulSoup

- Developed a React-based web application integrating an interactive Leaflet/OpenStreetMap map to display McDonald's outlets across Kuala Lumpur.
- Implemented web scraping with Selenium and BeautifulSoup to extract outlet details, storing the data in an AWS RDS PostgreSQL database.
- Designed and deployed a FastAPI backend on AWS EC2, exposing RESTful endpoints and configuring secure access to the PostgreSQL instance.
- Integrated a Gemini API-powered chatbot enhanced with Retrieval-Augmented Generation (RAG) to handle natural language queries and return relevant outlet information.

T-Port Predictive Maintenance & Misalignment Analysis

Jan 2025 - Mar 2025

~ Python, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, SciPy

- A data science analysis on the stacker crane's fork position to the transport port stands, to identify which t-ports needs to be readjusted, and whether the stacker crane's positioning parameters needs to be tuned at the transport port center position.
- Collected data on the forks position for up and down to the port stands, and center of the port to the AGVs QR code alignment at the center of t-port and the center of extended fork to the QR's center.
- The results for the crane's specific numbers and T-ports requiring adjustments were communicated to the respective suppliers.

Competitions	UROCK Software & Electrical Engineer ~ C++, C, Python, Makefile, CMake, Shell, OpenCV, ROS, TensorFlow/PyTorch, Gazebo, SLAM algorithms	KUALA LUMPUR, MY Sep 2023 - Nov 2024
	• Software architecture for controlling 12x high-torque servos (150 kg cm) using ROS communication between Jetson Nano and OpenCR. • Developed using C++ for low-level motor control and Python for high-level data processing and navigation tasks. • Integrated stereo cameras, LiDAR, and IMU sensors for SLAM-based autonomous navigation and obstacle avoidance. • Programmed startup scripts and automated environment setup via Shell scripting for seamless deployment. • Implemented computer vision for lane detection and correction using OpenCV and TensorFlow.	
Certifications	Data Science Professional Certificate (IBM) – Coursera Issued [February, 2025]	
	• Covered Python, SQL, machine learning, data visualization, and data analysis. • Completed hands-on projects using real-world datasets. Applied learnings from this course to do projects in industrial such as T-Port Predictive Maintenance & Misalignment Analysis, and personal project Resting Heart Rate Analysis	
	Deep Learning Specialization – Coursera (DeepLearning.AI) Issued [March, 2025]	
	• Built and optimized neural networks (CNNs, RNNs, LSTMs, Transformers). • Applied deep learning to speech recognition, NLP, music synthesis, and chatbots. • Implemented models using TensorFlow & Keras with techniques like Dropout, BatchNorm, and Xavier/He Initialization. • Applied learnings from this course to build the AGV Path Planner project	
Relevant Skills	• Programming: Python, C++, JavaScript, Java, Arduino • Frameworks & Tools: ROS, React, FastAPI, TensorFlow, Scikit-learn • Data & Machine Learning: Pandas, NumPy, Seaborn, Matplotlib, SciPy, Deep Learning (CNNs, RNNs, Transformers), NLP, RAG • Cloud & Databases: AWS (EC2, RDS), Docker, PostgreSQL, SQL • Robotics & Vision: SLAM, OpenCV, Gazebo, Jetson Nano, OpenCR, Astra Orbbec RDB Camera	
Awards & Scholarships	Jeffrey Cheah ACE Scholarship	
	Dean's List Award - Final Year Sem 8
